Please ~~replace~~ paragraph [0079] on page 16 with the following rewritten paragraph:

A8 [0079] Figs. 16A and 16B illustrate the Summary Report GUI 10. As indicated heretofore, the Summary Report GUI is accessible from various links within the GUI environment. The summary report GUI 10 includes generalized information related to the institution selected in the select institution drop down menu 1 (Fig. 15). From the Summary Report GUI 10 various other GUI reports may also be selected. For example, the Detailed Report GUI 11, the Ward Report GUI 12, or the New Selection link 9 may be selected. In particular, the inactive selections shown in a toolbar 20 are available for selection from the current GUI. This is true with each of the GUIs discussed. Similarly, the inactive tabs, part of the toolbar 20, are available for selection from the current GUI.

incontinence residents information icon 14 is selected on the summary report GUI 10 (Figs. 16A and 16B). Information in the superimposed window 25 relates a number of residents using incontinence products and the number of beds occupied by incontinent residents. The superimposed window 25 may be closed via a close button 26.

[0083] Figs. 19A and 19B illustrate a superimposed window over the Summary Report GUI 10. The superimposed window 27 shown in Fig. 18 is obtainable by pressing the Notepad icon 13 on the Summary Report GUI 10 (Figs. 16A and 16B). A human administrator of the GUI environment enters information for display in the superimposed window 27. Such information pertains to cost trends discerned from analysis of the data displayed on the Summary Report GUI 10, or alternatively other GUIs of the GUI environment of the present invention. However, the information may also include administrator advice related to suggested future purchases of incontinence products based upon data collected by the manufacturer. The type of information displayable in the superimposed window 27 is limitless within the confines of analysis of data related to used/consumed

incontinence products and the costs related thereto. The
superimposed window 27 may be closed using the close button 28.

Please replace paragraph [0084] on page 18 with the following
rewritten paragraph:

A11
[0084] Figs. 19A and 19B illustrate the Detail Report GUI. The
Detail Report GUI includes toolbar 20 with the tab box. For details
of the toolbar 20, see the discussion relating to Figs. 16A and 16B.
The Detail Report GUI 11 also includes Notepad icon 13 and
Informational icon 14. Two specific windows are included on the
detail report GUI 11. Those windows are incontinence products window
28 and keyfigures window 29. The incontinence products window 28
includes specific information related to pads 19, other 21, total
incontinence 23, and personal cost in relation to incontinence care
24. The incontinence products window 28 also includes a plurality of
graph links 30. The key figures window 29 includes information
relating to pads 32, other 34, and total incontinence 33.

Please replace paragraph [0086] with the rewritten paragraph

mcd.

Detail Ward Report GUI 37 includes two specific windows. The windows are an incontinence products window 44 and a keyfigures window 45. The incontinence products window 44 includes detailed information related to the pads 19 and other 21. The incontinence products window 44 in addition includes totals related to incontinence products and personal costs in relation to incontinence care. The information provided in incontinence products window 44 is similar to the incontinence products window 28 shown in Figs. 19A and 19B, yet the information provided in the incontinence products window 44 relates only to the specific ward chosen. The incontinence products window 44 also includes graph links 46. These graph links 46 may be selected to display specific information related to the incontinence products used within the chosen ward. An example of such a graph is shown in Figs. 24A and 24B, which will be discussed hereinafter. The keyfigures window 45 includes specific information related to a change rate and cost per resident each day for the products used in the chosen ward. See Figs. 23! and 23B for the specifics of keyfigures window 45.

Please replace paragraph [0092] on page 21 with the following rewritten paragraph:

A15 Figs. 24A and 24B illustrate a superimposed window containing a graph. The graph 46 is selectable using the graph links 46 contained in the Detail Ward Report GUI 37. The graph 46 shown in Fig. 5 relates to a specific type of pad used in the chosen ward. However, additional graphs may be displayed within these superimposed windows 46 using drop down menu 47.
